

SMARTBRIDGE

Let's Bridge the Gap | SKILL WALLET - A SmartBridge Product

Date	29-09-2026
Team ID	SWTID-2026-7949
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value

No. of Functional Features Included in the Solution

Functional Features Overview:
This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status	Weight
1	User & Identity Provisioning	Creation of departmental test user profile (EEE User) with contact details and enterprise credentials.	User Administration (sys_user)	Done	10%
2	Custom RBAC Role Architecture	Creation of granular security roles bb1 (Read), bb2 (Create), bb3 (Write), and bb4 (Delete) mapped to users.	Roles Module (sys_user_role)	Done	15%
3	Institutional Schema Design	Definition of custom table 'u_institution_details' with Roll No (Auto Number), Student/Faculty refs, Branch choice, and contact fields.	System Definition / Tables	Done	15%
4	Multi-Branch Test Data Seeding	Seeding verified student records across ECE, CSE, and EEE branches to enable rigorous access isolation testing.	Data Management / Form View	Done	10%
5	Script-Controlled Read ACL	Server-side ACL enforcing Branch condition ('EEE') + role check (bb1) with global admin override script.	System Security (ACL Engine)	Done	20%
6	Role-Controlled Create ACL	Restricting the 'New' record creation button strictly to users assigned the bb2 custom role.	System Security / Create ACL	Done	10%
7	Role-Controlled Write ACL	Enforcing field and row-level modification permissions solely for users possessing the bb3 custom role.	System Security / Write ACL	Done	10%
8	Role-Controlled Delete ACL & Verification	Securing single/batch record deletion strictly behind bb4 role and verifying zero data leakage via user impersonation.	System Security / Impersonation	Done	10%

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8 (100% Complete)
Core / Must-Have Features	6 (Read ACL, Schema, Roles, Create, Write, Delete)
Additional / Nice-to-Have Features	2 (Impersonation Audit & Multi-Branch)

	Mock Seeding)
Features Tested & Verified	8 (Validated across Admin, EEE User & Non-Role User)

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2 Features	Dynamic 'New' record button visibility & selective field editing controls on 'u_institution_details.list'
2	Backend / Logic	2 Features	Script-controlled IIFE evaluation with GlideSystem (gs.hasRole) API and runtime JavaScript authorization
3	Database / Storage	1 Feature	Custom relational table schema 'u_institution_details' with auto-numbering and branch choice mappings
4	API / Integration	1 Feature	ServiceNow Table REST API access alignment ensuring programmatic calls enforce identical ACL rules
5	Security / Authentication	2 Features	Multi-tier CRUD Access Control Lists (Read, Create, Write, Delete) and elevated 'security_admin' governance
